GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockpounds Constructed Prior to 1969"  
"Appropriation of Water in California"

Dear Mr. Jain:

STATEMENT OF WATER DIVERSION AND USE NUMBER 4982

Pursuant to your letter of August 30, 1992 we have updated our records to show the above numbered statement in the names of Navindra and Madhu Jain.

The next supplemental statement for reporting the use of water during the 1991, 1992 and 1993 will automatically be sent to the owner of record in January 1994.

Thank you for your cooperation.

Sincerely,

Dear Mr. Attway,

Please refer to the enclosed copy of your letter to Kirk Paulson who contacted you regarding transferring the ownership to the water rights associated with statement # S-4982 of Soquel Creek statutory adjudication as a result of transfer of ownership of the Lot 26.

The purchase of the property is now complete and has been recorded as shown by the enclosed copy of Grant Deed. You are requested to kindly change your records to reflect the new ownership for the said water rights. I will appreciate an acknowledgment from you confirming completion of the transfer.

Please let me know if I can provide any other information to assist the process.

Thanking you,

Sincerely,

*Navindra Jain*

**JUNE 24 1992**

Mr. Kirk I. Paulson  
Real Estate Broker  
Valley Realty  
1193 Saratoga-Sunnyvale Road  
San Jose, CA 95129

Dear Mr. Paulson:

**STATEMENT OF WATER DIVERSION AND USE NO. 4982 AND SOQUEL CREEK STATUTORY  
ADJUDICATION DECREE NO. 57081 IN SANTA CRUZ COUNTY**

This letter is in response to your inquiry of June 3, 1992 regarding water rights on 80 acres of land in Santa Cruz County. The information faxed on June 3 does not describe the location of the 80 acres in question but we assume you represent a party considering the purchase of all or a portion of property owned by Louis R. and Barbara W. Klindt.

The Klindt's claim a riparian water right and filed a Statement of Water Diversion and Use in 1970. The claim was given the identification No. of S-4982. That claim was subsequently a part of the Soquel Creek statutory adjudication where the claimed water right was quantified by the Santa Cruz County Superior Court as to amount, purpose and season with specific points of diversion and place of use.

"Schedule A-2 Allotments To Claimants From Independent Tributary Streams, Laurel Creek and Tributaries" from the decree list Louis R. and Barbara W. Klindt as claimants allocated water at diversion points 1-25 and 1-26 for Lot 26 in the amounts and priority specified. The points of diversion and Lot 26 are shown on a map entitled "Soquel Creek Stream System, showing Diversion and Places of Use, Santa Cruz County, California, dated 1975" (the map consists of eight sheets). Points of diversion 1-25 and 1-26 and Lot 26 are shown on sheet 1 (copy enclosed).

The lots on the map correspond to the lots as carried in the official records of the Santa Cruz County Assessor as of 1974, although the numbering system is different. Should the lots be subdivided in the future, the allotment for the original lot may be used on any or all of the subdivided lots.

Mr. Kirk I. Paulson

-2-

We suggest that any purchase of a portion or all of Lot 26 be reviewed by appropriate legal council to make certain the water rights are transferred in the desired manner. Once the water right matters are settled our records will be changed to reflect the current status of ownership.

If a contest develops as to ownership, the State Water Resources Control Board will not ordinarily change its records until the matter is either determined by a court or adjusted to the mutual satisfaction of the parties.

If you need additional information or have questions, please write or telephone me at the above number.

Sincerely,

Larry L. Attaway, Chief  
Petition Unit
